Our Product Introduction

Product Description

Product Description:

One of the best things about the Intelligent Hydroponic Planter is its automatic watering system. This system ensures that your plants are always getting the right amount of water, without you having to worry about over or under watering. This feature makes it an ideal choice for those who may not have a green thumb or who are new to gardening.

The Intelligent Hydroponic Planter is also a medium-sized planter, making it perfect for those who want to grow a few plants without taking up too much space. Its plastic material ensures that it is durable enough to last for years to come, even with frequent use. Whether you want to grow herbs, vegetables, or flowers, this planter is a great option.

Another great feature of the Intelligent Hydroponic Planter is its LED lighting system. This system provides your plants with the right amount of light they need to grow and thrive. This is especially important if you plan to keep your planter indoors, as it can be difficult for plants to get enough natural sunlight. With the LED lights, you can be sure that your plants are getting the light they need to stay healthy.

Finally, the Intelligent Hydroponic Planter is powered by electricity, which means that there is no need to worry about replacing batteries or running out of power. Simply plug it in and let it do its job. This makes it a convenient choice for those who want to set it and forget it.

Overall, the Intelligent Hydroponic Planter is a great choice for anyone who wants to add some greenery to their space without having to worry about the hassle of traditional gardening. Its automatic watering system, medium size, plastic material, LED lighting system, and electricity power source make it a top choice for those interested in green wall planter options or hydroponic growing systems.

Features:

Product Name: Intelligent Hydroponic Planter
 3 Light Mode: Yes
 Size: 52*23*33.5-66.7cm(adjustable the lamp post)
 Water Tank: 7L

Intelligent Circulating Watering Pump:	Automatic
Power :	34.7W
Size:	52*23*33.5-66.7cm(adjustable the lamp post)
Color:	White
Water Tank:	7L

Applications:

The ANROFU Z244 hydroponic planter is perfect for those who want to grow plants indoors, especially in areas where space is limited. Its hydroponic system allows for plants to grow without soil, which means that you do not have to worry about messy dirt or bugs. The hydro grow system also makes it easy to monitor the plant's growth and health, ensuring that they get the right amount of nutrients and water they need.

This hydroponic growing system is powered by electricity, which means that it is energy-efficient and easy to use. The timer function allows you to set the watering schedule for your plants, ensuring that they get the right amount of water at the right time. This is especially useful for those who have busy schedules and may forget to water their plants regularly.

The ANROFU Z244 hydroponic planter is made of high-quality plastic, which makes it durable and long-lasting. It is also easy to clean and maintain, which means that you can keep your plants healthy and thriving without too much effort.

The medium-sized ANROFU Z244 hydroponic planter is perfect for growing a variety of plants, including herbs, fruits, and vegetables. It is ideal for use in kitchens, living rooms, and other indoor spaces where you want to add a touch of greenery. It is also a great way to teach children about the joys of gardening and the importance of taking care of the environment.

Whether you are a beginner or an experienced gardener, the ANROFU Z244 hydroponic planter is an excellent choice for growing plants at home. Its hydroponic system, timer function, and easy-to-use design make it a convenient and practical tool for anyone who loves gardening.

Support and Services:

The Intelligent Hydroponic Planter comes with technical support and services to ensure the best user experience. Our team of experts is available to provide assistance with any technical issues that may arise with the product.

Additionally, we offer a range of services to help you get the most out of your hydroponic planter. This includes:
