Basic Information

- Brand Name: ANROFU
- Certification: CE ROHS FCC
- Model Number: DI-S23
- Minimum Order Quantity: 1
- Delivery Time: 5-8 days
- Payment Terms: T/T, Western Union
- Supply Ability: 10000pcs/ day

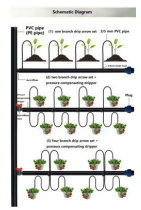

Product Specification

- Product Name: Greenhouse Drip Irrigation System
- Type: Irrigation System
- Timer: Optional
- Coverage Area: Up To 1000 Square Feet
- Diameter: 3/5mm
- Material: Plastic
- Application: Agriculture
- Pressure Rating: 20-200kpa
- Highlight: **Precise Water Distribution Drip Irrigation System**
, Plastic Greenhouse Drip Irrigation System,
3/5mm Dimater Drip Irrigation System

Product Description

Product Description:

Are you looking for an efficient and reliable irrigation system for your agricultural needs? Look no further than our Drip Irrigation System, designed to meet the demands of modern agriculture and gardening. This system is a must-have for anyone involved in greenhouse irrigation products, agricultural irrigation, or garden irrigation systems.

The Drip Irrigation System boasts a Pressure Rating of 20-200kpa, ensuring optimal water flow and distribution throughout your garden or agricultural area. With this system, you can rest assured that your plants will receive the right amount of water at the right pressure, promoting healthy growth and maximizing crop yields.

One of the key features of this system is its diameter of 3/5mm, which contributes to its durability and longevity. The sturdy construction of the components ensures that the system can withstand varying weather conditions and constant use, making it a reliable investment for your irrigation needs.

With a Coverage Area of Up To 1000 Square Feet, this Drip Irrigation System is ideal for both small and large-scale agricultural operations. Whether you have a greenhouse, a garden, or a farm, this system can efficiently water your plants and crops, ensuring even distribution and minimal water wastage.

The Drip Irrigation System is specifically designed for Agricultural Application, catering to the unique watering requirements of crops and plants. By using this system, you can customize the watering schedule and frequency to suit different types of vegetation, promoting healthy growth and maximizing crop production.

Our Product Introduction

This Irrigation System falls under the category of Greenhouse Irrigation Products, making it a popular choice among greenhouse owners and operators. Its efficiency, reliability, and ease of use make it a valuable asset for maintaining optimal growing conditions inside a greenhouse, ensuring that your plants thrive and flourish.

Whether you are a professional farmer, a gardening enthusiast, or a greenhouse owner, the Drip Irrigation System is a versatile and practical solution for all your watering needs. Its innovative design, high-quality materials, and efficient performance make it a standout choice in the realm of agricultural irrigation systems.

Features:

Product Name: Drip Irrigation System
Length: 50cm
Coverage Area: Up To 1000 Square Feet
Pressure Rating: 20-200kpa
Type: Irrigation System
Material: Plastic

Applications:

The ANROFU DI-S23 Drip Irrigation System is a versatile and efficient solution for garden and greenhouse irrigation systems. Designed and manufactured in CHINA, this system is suitable for a wide range of applications in agriculture.

With a coverage area of up to 1000 square feet, the DI-S23 is ideal for both small and medium-sized gardens, as well as commercial greenhouse operations. Its pressure rating of 20-200kpa ensures consistent and reliable water distribution, making it perfect for maintaining healthy plant growth.

The system's 3/5mm diameter allows for precise and targeted watering, ensuring that plants receive the right amount of water without wastage. This makes it a cost-effective and environmentally friendly choice for irrigation.

Whether you are looking to set up a garden irrigation system for your backyard vegetable patch or a greenhouse drip irrigation system for your commercial nursery, the ANROFU DI-S23 is a dependable and easy-to-install solution. Its durable construction and efficient design make it suitable for a variety of crops and growing conditions.

Experience the benefits of a reliable and efficient irrigation system with the ANROFU DI-S23. Say goodbye to manual watering and hello to healthier plants and higher yields with this versatile and high-quality drip irrigation system.

Customization:

ANROFU offers Product Customization Services for the Drip Irrigation System model DI-S23. This product, originating from China, is specifically designed for Agricultural Irrigation purposes; this Greenhouse Drip Irrigation System has a pressure rating of 20-200kpa and a diameter 3/5mm. Customize your system with ANROFU to enhance your Greenhouse Irrigation Products.

Support and Services:

The Drip Irrigation System product offers comprehensive Product Technical Support and Services to ensure optimal performance and customer satisfaction. Our team of experts is available to assist with installation guidance, troubleshooting, and maintenance tips. Additionally, we provide regular product updates and educational resources to help users maximize the benefits of their drip irrigation system.
