

## 2L / 4L / 8L Arrow Dripper Kit , Four Branches Best Drip Irrigation System For Vegetable Garden

Our Product Introduction

for more products please visit us on [growled-light.com](http://growled-light.com)

### Basic Information

- Brand Name: ANROFU
- Certification: CE ROHS FCC
- Model Number: DI-S23
- Minimum Order Quantity: 1
- Delivery Time: 5-8 days
- Payment Terms: T/T, Western Union
- Supply Ability: 10000pcs/ day

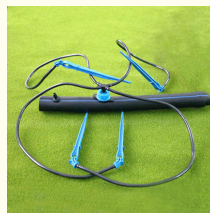

### Product Specification

- Type: Irrigation System
- Material: Plastic
- Pressure Rating: 20-200kpa
- Arrow Irrigation Size: 3/5mm Pipe
- Application: Agriculture
- Cable Length: 50cm
- Coverage Area: Up To 1000 Square Feet
- Usage: Water-saving Irrigation System
- Highlight: **8L Arrow Dripper Kit, Four Branches Drip Irrigation System, best drip irrigation system for vegetable garden**

### Product Description

#### Product Description:

The Greenhouse Drip Irrigation System is a convenient and efficient solution for maintaining proper irrigation in agricultural settings, such as greenhouses. This system is designed to provide targeted watering to plants, ensuring they receive the right amount of moisture for optimal growth and productivity.

One of the key features of this Greenhouse Drip Irrigation System is allowing users to schedule watering sessions at specific times. This feature is particularly useful for busy farmers or greenhouse owners who may not always be available to manually water their plants.

With a pressure rating of 20-200kpa, this irrigation system delivers water evenly and consistently to plants without causing damage or wastage. The regulated pressure ensures that each plant receives the required amount of water, promoting healthy growth and reducing water consumption.

The Greenhouse Drip Irrigation System has a diameter 3/5mm, making it suitable for delivering water directly to the roots of plants. This precision watering method helps prevent water loss through evaporation and runoff, maximizing the efficiency of the irrigation system.

Designed specifically for agricultural applications, this Greenhouse Drip Irrigation System is an essential tool for greenhouse owners looking to optimize their watering practices. By providing targeted irrigation to plants, this system helps improve crop yields, reduce water usage, and promote overall sustainability in greenhouse operations.

Whether used for fruits, vegetables, flowers, or other crops, the Greenhouse Drip Irrigation System offers a versatile and adaptable

Our Product Introduction

solution for greenhouse irrigation needs. Its efficient design and reliable performance make it a valuable asset for any agricultural setting.

In conclusion, the Greenhouse Drip Irrigation System is a reliable and effective solution for greenhouse owners seeking to enhance their irrigation practices. With its optional timer, pressure rating of 20-200kpa, 3/5mm diameter, and suitability for agricultural applications, this system provides the necessary tools for efficient and targeted watering. Invest in the Greenhouse Drip Irrigation System today and experience the benefits of a well-maintained and productive greenhouse environment.

### Features:

Product Name: Drip Irrigation System  
Type: Irrigation System  
Length: 50cm  
Application: Agriculture  
Pressure Rating: 20-200kpa  
Coverage Area: Up To 1000 Square Feet

### Applications:

The diameter plastic tubing used in the DI-S23 ensures durability and reliability, making it a long-lasting investment for users. Additionally, the optional timer feature allows for convenient automation of watering schedules, providing users with flexibility and control over their irrigation system.

For garden irrigation scenarios, the ANROFU DI-S23 offers a cost-effective and water-efficient solution for maintaining healthy plants and lush landscapes. Whether used in small residential gardens or large commercial setups, this drip irrigation system can help conserve water while ensuring proper hydration for plants.

In greenhouse irrigation setups, the DI-S23 excels in delivering targeted watering directly to plant roots, promoting optimal growth and minimizing water wastage. The precise control offered by this system is particularly beneficial for sensitive plants or crops that require specific moisture levels.

Overall, the ANROFU DI-S23 Drip Irrigation System is a reliable and effective choice for garden and greenhouse irrigation needs. Its user-friendly design, durable materials, and optional timer feature make it a practical solution for anyone looking to enhance their irrigation practices and promote healthy plant growth.

### Customization:

Enhance your Garden Irrigation System with our customizable Drip Irrigation System from ANROFU. The model number DI-S23, designed in CHINA, offers a convenient Timer option for automated watering. With a thickness of 0.6, this system is ideal for Agriculture applications, made of durable Plastic material. It has a Pressure Rating of 20-200kpa making it suitable for various setups such as Greenhouse Drip Irrigation Systems.

### Support and Services:

The Product Technical Support and Services for the Drip Irrigation System include:

- Installation guidance to ensure proper setup of the system.
- Troubleshooting assistance to address any issues that may arise during operation.
- Maintenance tips to keep the system running efficiently.
- Product warranty information to provide customers with peace of mind.
